

Heavy Civil Construction

- **Ideal machines** for setting bridge beams or demolishing bridges
- **Minimal downtime**, excellent service
- **Excellent parts availability**

Dependable Machines

“We own several cranes from Stephenson including a Grove RT700, a Manitowoc 12000, and a Manitowoc 222. We’re a heavy civil construction company specializing in water treatment plants, roadwork, and blacktop, so our cranes are always running, and they haven’t let us down yet!

“We use some of our cranes for pile driving, and most of them do concrete work. They are perfect for setting bridge beams and demolishing bridges. We also do a lot of hook work.

“We chose Manitowoc and Grove, because they’re good, reliable machines. We’ve had very minimal breakdowns, and Stephenson’s service is always good. We chose our machines because of the quality of the Manitowoc Group and the cranes they make. They are high quality machines.”

Outstanding Customer Service

“I’ve probably been working with Stephenson for six years. Our salesman, Matt Essig, has been very helpful. He’s always there, whenever we need anything. We’ll give him a call, and he’ll help us out with mechanics and parts. He always directs us to the right place.

“Customer service is one of Stephenson’s main strengths. Their mechanics and parts availability are also very reliable. They always go above and beyond with anything that we need. The other day we broke a track on our Manitowoc 222. Stephenson found out about it around 10:00 am. By the following morning, they had it in their shop at Harrisburg. Stephenson had the part air freighted in from one of Manitowoc’s shops in Wisconsin. The next morning, our crane was ready for our mechanic to pick up. When you bring your machine in for repairs, it is only down for a minimal amount of time.”

— Tim Lambert

Crane Rigging Superintendent, Allan A. Myers Contractors, Inc.

About Allan A. Myers Contractors, Inc.

Allan A. Myers Contractors, Inc. was founded in 1939 as a local hauling company that operated throughout the Philadelphia suburbs. Still a family business, the company was originally known as Allan A. Myers and Sons and began operations in the blacktop and road building industries. As the company grew, it expanded into heavy civil construction projects. Together with American Infrastructure and Independence Construction Materials (ICM), Allan A. Myers operates as the largest heavy civil contractor in the Mid-Atlantic region.
